Out, obs form of OUGHT, AUGHT

Out- in *comb* is used with substantives, with verbs and their derivatives, and with other adverbs

In OE. *ut* adv was already prefixed (1) to ordinary sbs. in the sense 'that is without', 'out lying external' as in *utland* a country that is out a distant or foreign land *uthere* an army belonging to or coming from without, a foreign army (2) to verbal sbs. and nouns of action and agent nouns derived from verbal roots, as *utfær utfaru, utferld útgang*, going out, exit departure *utdræf* expulsion *utdræfere* one who drives out, *utlád* carriage out exportation, *utryne* running out, excursion, expiry, (3) to elements forming adjs, either related to the sbs. in 1 as *utlende utlendisc* outlandish, foreign, or derived from vbs. ppl adjs) *utiernende* out running, purgative. In these nominal compounds the stress was always on the prefix

With verbs, *ut* like other adverbs formed separable collocations or semi-compounds, in which the position of the adv was shifted according to the construction of the sentence as in the separable compound verbs of modern German (although in OE the order was not yet so rigid). Thus, *ut* followed the vb. in the imperative as *gá út! adó ut þone bēam* and in the pres. and pa. indicative in the principal sentence, as *he cymþ út he code út ða fixas út* But in the dependent sentence and in all other moods or parts of the vb including the infinitive and pples. and all nominal derivatives the adv stood immediately in front of the vb; thus *ðá he ut cymþ* when he comes out, *gif he ut cyme* if he come out *nú wille we út gán* now will we go out *ut gangendum ðam mónþe* on the month going out In OE the adv was regularly written separate, but in translations from Latin compound verbs in *ex* were sometimes rendered by compound vbs. in *ut* in which the adv was not only joined but even retained before the vb in the principal sentence e g Ps xviii 5, 'in omnem terram exivit sonus eorum' *Vesp Ps* 'in all eorðan *utéode* sweg heara' The regular position of *ut* before the vb in the inf gerund and pples naturally tended to make the collocation pass into a combination esp when these were used as sbs or adj and this is the cause why *outgoing outgoer outgone* belong in meaning to *go out outstretching, outstretched* to *stretch out outgrowing, outgrowth* to *grow out outlook outlooker* to *look out* It is only in later Eng that such collocations as a *going out* dress, a *clearing-out* of cupboards, the *bringers-out* of a new play a well *thought-out* article, have become possible

As to the verbs themselves, in ME usage became more lax On the one hand the adv began to be placed after or away from the vb. in the subordinate sentence the infinitive, etc., on the other hand the older usage of the inf in *ut gán*, and the like, was often extended to the indicative, so that we find *he out yede, the blod out brast* This was partly due to a general levelling and loss of old syntactical distinctions, so that beside *he sprang out* and *then sprang he out*, it became allowable also to say *he out sprang* and *out sprang he*, in both of which the adv stands before the vb These novelties in word order were especially employed by metrical writers as facilitating the exigencies of rhythm and rime, and it is chiefly in metrical compositions that they are found But they also occur in translations from Latin, as e.g in the works of Wyclif, in which L. vbs. in *ex* are constantly rendered by Eng verbs preceded by *out* In ME the elements were still commonly separated in writing, but modern editors have usually hyphened these collocations as compounds

As a result of these various causes, there are numerous *quasi*-compound vbs. in *out* in occasional use chiefly poetical, in precisely the same sense as the ordinary prose form in which the simple verb is followed by the adv, e g. *out pour – pour out* Not unfrequently, moreover, where *out* stands before a vb. as a mere metrical or poetical inversion, as in 'A frightful clamour from the wall out broke', 'Out went the townsmen all in starch', the two words, though merely inversions of *broke out went out* are hyphened as if compounds The tendency so to treat them is probably strengthened by the existence of *outbreak* (sb), *outbreaker, outbreaking, outbroken outcome outcoming* and the like But in these latter the position of the adv is original and the stress is on *out*, while in *out broke out went* the stress is on the vb

On these accounts it is difficult to deal satisfactorily with the hyphened *quasi* compounds in *out* Such as seem of importance or occur as senses of *out* verbs having other senses are given among the Main words (where it is often indicated that they are not true compounds, or are only poetical), others are given in this article, but no attempt has been made to exhaust them The same is true of vbl sbs and ppl adjs in *-ing* ppl adjs. in *-ed -en*, etc, and agent nouns in *-er* which are permanent possibilities from any verb that can be followed by *out* as in *outgoing, outgone outgoer* from *go out*

True compound vbs. in *out* are those in which it imparts the sense of outdoing surpassing exceeding or beating in some action as in *outlive outlie outnumber, outface*, and the various extensions of these contained in C II These are of later origin a very few (e g *outlive outproffer outbid outpass*) appear in the end of the 15th c they increase gradually during the 16th c (*outrun* in Tindale *out cry out eat outgo outride outtime outrow* in Palsgr) and become numerous only *c* 1600, being freely and boldly employed by Shakspere who is our earliest authority for many of them including the curious group typified by to outfrown frowns 'to out Herod Herod' It is not very clear how this use arose, or to what sense of *out* it is to be referred But the earlier of these *out*-compounds were in nearly every instance preceded by a form with *over* Thus *outlive* (1472 was preceded in same sense by *overlive* (in OE) For *surmore outpass* in 'the Water of Thamys outpassynge his boundys (1494), was preceded by *overpass* For *surpasser* It would seem therefore that *out* has here the sense of beyond It is possible however that in *outbid* there entered in some association with OUT 6 b 23 as if it were 'to bid to see another *out* or at an end' One who *outbids* another bids *beyond* his rival until he drives him *out* of the contest Cf also the relation of the two notions in 'the ship outrode the storm', and 'the horseman outrode his pursuers', or 'he outrode all competitors in the race'

Of these a few existed already in OE, e g *utland* outside or outlying land, foreign land, OUTLAND, *utgársecg* the outer ocean (see OCEAN), *útgemære* extreme boundary, *uthealf* external side, outside, *utweald* outlying wood, *uthere* foreign army, *utwíceng* foreign pirate or viking The number of these has in later times been greatly increased Those of longer standing are written as single words, in the more recent, the two elements are usually hyphened, but they are also sometimes written separately in which case *out* functions as an adj = 'external, exterior, outlying, outer' see OUT *a* As the meaning is the same either way, the separation or hyphening of the two elements is in many cases optional (Cf BACK)

·**23** **a.** In most of the groups 18 22, the compound vb in *out-* may be cognate with the object, being formed either on the simple verb belonging to the object, or directly on the object itself, usually unchanged, but sometimes with a verbal ending (e g *-ize*) The object may be a person or a thing, and the sense is 'to outdo the agent in his own sphere or work', or 'to exceed or surpass the action, quality, or other thing'. Our earliest examples of this are from Shakspere, who has 'out-frowne Fortune's frowne', and 'out villaind villanie', it is rare in the 17th c., but greatly used

b Hence esp with proper names of persons, nations, sects, etc, in the sense of 'to outdo the person, etc, in question in his special attribute' The classical example is Shaksp're's OUT HEROD *Herod*, a few instances are found in the 17th c, esp in Fuller, and in the 18th c. in Swift, but the vast development of this, as of so many other Shakspearian usages, belongs to the 19th c, in which such expressions have been used almost without limit Examples are *out Achitophel, Alexander, Bentley, -Boniface, -Bonner, Brutus, -Darwin, Milton, -Mormon, Nero, -Ottoman, Quixote, Sternhold, -Timon, -Toby, -Trollope, Turk, Tola*, etc, and, with verbal ending *out-Calvinise, Germanise, -Gothamise, -Hobbesize, -Huntingtonise*, etc. A few examples follow in chronological order to illustrate the growth of the usage

OUTBEAR.

Common in 13th c. in legal documents in the Latin forms *uthestum*, *huthestum*, *hutestum*, and later *hutesum*. These have been sometimes thought to be the source of the ME *outas* and to be themselves of OF origin derived from *huer huter*, to cry *hu*, *huée cry* (*hu a cri* hue and cry), which suits the sense perfectly But *hutesum* cannot be etymo logically accounted for from this source, nor is the word known in any form, Latin or vernacular outside England On the other hand, *uthêstum* as a latinization of ME. *uthes* is quite in order It is very likely however, that *hutesum* and (still more) *hutesum* are Norman Fr alterations, due to association with *huée hu huée Uthes uthes* are also most easily explained as Anglo Norman formations from *uthestiour* As to the sense, *uthês* could hardly mean 'outcry' but might well be the 'calling upon people to the pursuit of a thief or other offender, which is the sense in the oldest and other of the quots. (Compare the expressions *le cri clamorem, levare huth. sum, lever le hu*)

† **Ou·t-fangthie·f.** *Old Eng Law Obs* In 2 **utfangenes þeof, utfangenethief**, 3 **utefang-**, 3, 4 **outfangen(e)-, -fange-, -thef** [Answers to an OE type *útfangenne þéof* (accusative case) 'out-caught thief', but the expression appears to have come into use later, to match *in fangenne þéof*, Infangthief, q v] A franchise of a lord of a private jurisdiction, more extensive than that of Infangthief, originally, the lord's right to pursue a thief (at least when the latter was 'his own man') outside his own jurisdiction, bring him back to his own court for trial, and keep his forfeited chattels on conviction. But the right was variously defined or circumscribed in the 13th c, when its meaning seems to have already become conjectural

The term *infangenne þef* occurs in several OF Charters, but of *útfangenne þéof* no trace has been found except in an alleged charter of Egbert dated 828 (Birch *Cartul Sax* No 398), which has the Latin phrase *quos foris cumpenen stone intus et foris* the apparent equivalent of an OE 'mid infangenum þeofe and útfangenum. But this is extant only in the *Liber Roffensis*, which may be suspicious, or the phrase may be a 12th c. interpolation. The term is wanting from an Eng. Fr. Glossary of Law Terms compiled 1292-1300 (Wright *Rivio*, Rol. 1872) 339 which contains *'Infangenethef'*—larum prin ens nostre tere On the other hand, *útfangene þef* occurs in the forged Charter of Edgar to Glastonbury (Birch, No. 1272), which was in existence before William of Malmesbury made the third version of his *Gesta Regum* 1130-40 (in which the charter is given); and it may thus go back to 1100, or even earlier

The etymological sense 'out caught thief', i e thief apprehended outside (the jurisdiction), is that assigned to it in the Ripon record of 1108, in which the grant of 'in fangethef et outfangethef was explained as giving the grantee the right to try 'his own thef *ubicumque captum*, whether within or without his territorial jurisdiction. But Bracton and *Fleta* explain it as the right to try thieves coming *from without*, and apprehended within the lord's jurisdiction; they both expressly deny that it meant a thief *taken outside*, or that such a thief might be brought back into the jurisdiction to be tried *Fleta* how ever adds that, after his own thief had been condemned by the outside tribunal, the lord might bring him into his jurisdiction and hang him on his own gallows; and the right to do this appears to be all that Britton knows as 'the franchise of outfangenthef.

1 The action of putting a person out of the protection of the law, or the legal process by which a person is or was proclaimed or made an outlaw, the condition of one so outlawed + In early use often = exile, banishment

Outlawry at first a declaration of war by the community against an offending member [gradually] became a regular means of compelling submission to the authority of the courts, as in form it continued to be down to modern times Before the Conquest outlawry involved not only *forfeiture* of goods to the king but liability to be killed with impunity In the 13th c. outlawry loses some of its gravity instead of being a substantive punishment, it becomes mere "criminal process a means of compelling accused persons to stand their trial (Pollock & Maitland *Hist Eng Law* I 97 459) In the 14th c the process was extended from cases of felony to misdemeanours and civil actions, so as to be a punishment for contempt of court in not appearing to answer an indictment or defend a personal action or for disobedience to a judgement of the court

Outlawry for debt was frequent down to the 18th c. Along with this extension of the process, its conditions and con sequence underwent continuous mitigation : in later times, in civil actions, it was reduced to the fact that the outlawed person was incapacitated from prosecuting an action for his own benefit though he might still defend himself

Clandestine Outlawries In civil proceedings outlawry has long been obsolete and was formally abolished by the Civil Procedure Acts Repeal Act of 1879 (42 & 43 Vict c. 59) While it was in use great injustice was often done in consequence of the insufficiency of the machinery for giving pul lic notice of the fact that a defendant in a personal action had as a result of civil process, been made an outlaw 1879 Act 31 Eliz c 3 was passed 1 for the auoyding of secret Out lawries in Actions Personall against the Queenes Subiects This being subsequently condalmed inefficient installing measures were introduced and one such bill has had the singular fortune to become the formal instrument of assert ing the right of Parliament to proceed to outlawry without reference to the immediate cause of summons by being in troduced and read a first time as the first business of every session before the reading of the King or Queen s Speech This precaution goes back to early times, being referred to as an established practice in 1603 Formerly some one bill was used for the purpose on each occasion ; but since 1 Dec 1743 the means uniformly employed has been a Bill for the more effectual preventing Clandestine Outlawries in per sonal actions and this is still annually introduced without the outlawries against which it is directed have long disappeared

Out of (ūu tɒv) *prep phr* Also 1-4 ūt of, 4 out o, (7- o) 4 7 out a, 4-6 oute, owt e of 1 Forms: and still in writing, two words, viz the adv Out followed by the prep Of (in its primary sense = from) In analysis *out of* is precisely on the same level with the obs. *down of*, *up of*, and the current *forth of*, *out from*, *out to*, *down from*, and other instances of an adv followed by a prep which defines its relation to an object. But in Oh as in Ow and the Northumbrian prep *ut* (Obs, ON *ut af*, Sw *ut af*, Da *ud af*) became the regular equivalent of *I ex*, *Gr ἐξ*, *La* (while Ger and Du used the adv itself as a prep), *out of* has thus acquired a unity of sense and also of pronunciation which entitle it to separate treatment, whereby also its own sense development can be more distinctly exhibited

The history of *out of* is partly parallel to that of *in to* with the differences that the latter is now written *into* as one word and that *out of* is the opposite not only of *in to* but also of the static *in*. One reason why *ut of* has not needed to be written as one word may be that the distinction now made between *into* and *in to* is in the case of *out* expressed by *out of* and *out from* thus Ilcy came in to me into my house, he went out from me, out of my house

†Output'ter. *Obs* [OUT- 8.] One who puts out.

1. One who puts or pushes out

Outputters and *outputtire* are here applied to the same person. Either of these may be a misprint for the other, or the words may be used as synonyms of PUT, PUTTER, PUTTIRE in the passage (which, as printed, is incoherent and corrupt) purports to be from a prophecy of Merlin, in which *outputter* may have been the orig word. The precise sense is not determinable

5 A term applied to certain maintainers and abettors of thieves or freebooters

In 9 Hen. V it appears from the context to be applied to persons in Redesdale who maintained and fitted out thieves for depredations in the adjacent counties of Scotland and Bp Jickson seems to have understood and used it of persons who put out their neighbours cattle or goods into pls ns handy for thieves with whom they were in league. cf. Note Rastell's long transl. of the Statutes ed 1543) recurs in the Act of 1421 "felons called intakers and *outputters*" in obvious misprint has not however repeated in all editions previous to that of Rutlhead in 1763 (which retains "outputters in the text with "outputters" in the margin. Hence "outputter was accepted as a genuine word by Cowell, who in his *Interpreter* further identified the "out parter" with the thief with which erroneous explanation the bogus word has duly reappeared in the Law Dictionaries down to Wharton, as well as in Phillips Kersey, Bailey, Ash, Crabbe, Ogilvie's *Imperial Dict.*, *century Dict.*, and Funk's *Standard Dict.*, it was cleared by Johnson and Webster. As if one error were not enough Wharton has also *Outputs*, with an explanation founded upon the latter part of Cowell's words, but making "house" into manor house." This last blunder is taken over from Wharton by Cowell's *Imrnl Dict.*, Ogilvie, and *Century Dict.* (all professing to take it from Cowell). In Bosworth, *Anal Northumbl* (1 p. 1 60, the "outparters of 1541 appear in a new guise as "outpartners", erroneously said to be used in the English canon of 1421, which has *Out parters*

Over (ōu·vəɹ), *a.* Forms *a* 1 **ufera, o,** 3 **ufere,** 3 **uuere** (= **uere**) *oure*; *β* 4 **ouere,** 5– **ouer.** [OE. had *uferra, e, yfer(r)a, e* adj., the former of which survived in early ME. *ufere, uvere* written *uuere uuere*), for which in writing *over e* was substituted bef 1300 (Cf OHG *obaro* MHG, Ger *obere*, which represents an OTeut **ubaro-**, while the OE forms repr the types **ubasto-**, **ubero-**.)

Dialectally the form *over* is still widely current for the adjective (see E D D) so that the ME. spelling, *overie* (as in the later Layamon text for the earlier *vuerie*) may originally have been only a graphical or (as) that exactly as in *above dove love* etc. But 13 ME. the adj fell together in use with Over *adv.* in comb. from which I feel it cannot always be separated: many important examples being written either way: thus the OE. *uferra hyppa* 1 mod. dial. *neverlip*, occurs in Chaucer MSS as *overe lippe* and *overelippe*. This would naturally lead to the pronunciation of *over* from *uferra* with that of *over* from OE. *ofer* a result prob. completed in Standard Eng. during the ME. period. And this identification led further to the habitual use of the adverbial prefix *over-* in other words (e. g. 2 4).

Although originally itself a comparative for *over* having no positive of its own has been in modern times treated as a positive, and has developed a comparative (Overer and Overest) and a superl. (Overest or Overmost) only the last of which is now in (local) use. See these 1

Over- is used with adverbial, prepositional, and adjectival force, in combination with sbs., with adverbial and prepositional force in comb. with verbs, with adverbial force in combination with adjs., advbs., and prepositions. Its combinations are therefore exceedingly numerous, and, from the wide range of its meaning, very diverse in character. The following are the chief classes, but many words have senses falling under two, three, or more of these, and there are individual words in which the original sense of the prefix is so modified that it is difficult to assign them to any class. In some of its uses, moreover, *over-* is a movable element, which can be prefixed at will to almost any verb or adjective of suitable sense, as freely as an adjective can be placed before a substantive or an adverb before an adjective. Although usually hyphened or even written as one word, such combinations are hardly dictionary facts: they are really syntactic combinations which make the use and construction of *over* in the particular position more clear and obvious. In some of these combinations, however there is a closer unification of sense, and others have a long history which it is desirable to show. All important combinations of *over*, therefore, including such as occur in more than one sense, and all such as seem to require explanation, are treated as Main words in their alphabetical places of the unimportant or obvious ones, examples are here given under the classes to which they belong, with a few illustrations, but no attempt is made to enumerate all that have been used, much less all that are possible.

Over- (like *ufar* in Gothic *ubar* and *ober-* in OHG. *ohar* in OS. *ubar* in Ger., *over* in Du. *ofer-* *ofr-* of in ON.) was already in OE. used in comb. with vbs. as *ofercuman*, *ofercumen*, *ofercuðan*, *ofercuðnes*, *ofercuðlean*, with sbs. as *oferealdorman ofergeat*, *ferngeat ofersæd*, *ofersmirt ofersiþu*, *ofersorh*, *ofersorhnes*, *ofersorhful*, *ofersorhlufu*, *ofersorhlufe ofersorhful fremicel* also in adjs. formed from adjs. and in derivatives of phrases as *ofersælde ofersælnesse* from *ofer sæl*. Many of the OE. compounds are still in use but the more part failed to live into ME. and the great majority of existing *over-* combinations are of later formation chiefly since 1500.

For the original stress of verbal and nominal compounds respectively, an l later modifications, see Out. As *over* is of two syllables, there is necessarily a subordinate stress, or even in verbal -mpoun ls, where the main stress is on the root syll-ble. This rises in sense 27 to a distinct secondary stress, *ófer-hánd* ppl. *a.* and *adv.* bend too much. From *overbe nd* bowed over. In verse the unstressed *over* is often reduced to *o'er* a single stressless syllable as *o'er-be nd o'erlook o'er-lap* but *o'er* with main or secondary stress is not properly reduced to *o'er-* unless the position allows the stress to be retained as in *o'er-ena mowed o'erin-ense o'er-asa mption o'er-replu tion.* See senses 27, 30.

1. With verbal or adjectival temporal senses, and in uses directly related to these.

1. With verbs, or with sbs formng vbs., in the sense 'over in space on high, above the top or surface of,' as Overbrood, canopy, drop, hang, roar etc. Also (*b*) in sense of 'rising above, overtopping,' as Over rise, top, tower, and (*c*) with the sense of position implying other notions of which it is a condition or element, as Overeye, Overlook. Overlay Overwrest which see.

The compour t verb is equivalent sometimes to the sample vb with *o er* adv. as in Overlay to lay (something) over or more freq-ently to the simple vb. (usually) with *over* prep. as in Oversnan to hang over (something) Over lie to lie over or above (something) but in many cases, as Overlook it is difficu lt or impossible to distin guish clearly.

25 With the sense 'exceedingly, beyond measure, lavishly' In verbs, often rendering L. *super*, as Overabound, flourish, -glad, -grieve, high, hope, joy, etc In adjs, as Overdear, *o ver exce lling, o ver glorious* Now *obs* or *arch*, the sense having usually passed into 27

a 1656 By Hall *Invis World* iii. 1 Those 'over excelling glories of the good Angels. 1633 Ford *Tis Pity* v v How 'over glorious art thou in thy wounds Triumphing over infamy and hate!

26 With the sense 'to a greater extent or at a greater rate than is usual, natural, or intended, too far' In verbs, as Overact, bid, bly -carry, count, -rater, esteem, estimate, -hold launch, let, -pay, prize rate, sell, etc. In adjs, as Overawful, etc

27-30 With the sense 'to excess, too much, too' Now in leading sense of *over-* in combination with verbs, adjectives, substantives, and adverbs.

In mod Eng very common with a negative (esp. in adjs. and their derivatives) as in *not over-ate not over-obliging he was not over pleased with the result* in which *not over* is said by litotes for 'not quite enough', 'somewhat de ficient'), *not over-nice* – rather wanting in modesty.

This sense was not approached in Gothic by such *ofer-full*s 'full to overflowing' and the vb *ofarwahsnan* to grow exceedingly (repr Gr *περισσεύειν*) it was frequent in ON expressed by *ofr-* of, before adjs. nouns of quality and action, rarer with vbs. occasional in OHG. *ô bar-zagi, ubar-trunchan, trenkan ubar-fullî* of MHG. *ûbervol* In OE. it occurs in many adjs a few in vbs and various derivative or other sbs. In OF and the cognate lang. *over* was in true combination its generalized use in mod Eng renders it much more a distinct element often merely in syntactical combination so that except in a few words of old standing it is usually hyphened to the word with that qualifies.

In verbs, there is a distinct secondary stress in *over-* which may in case of ambiguity or emphasis become the main stress. Adjectives, participles, and adverbs have normally even stress *o ver-a pt over-ad ve nt as over we ry over often* either stress being liable to be subordinated according to the construction and emphasis. Thus *an over a pt scholar we think him over a pt we want culture, not over-cu lture* In this sense, *over-* is rarely contracted in verse to *o'er* and properly only where the stress can be retained as in *o er-rea ms moored.*

27 With verbs (or with sbs. or adjs. forming verbs) A few occur in OE. e g *ofercôm, -ûbrucan,*

-drincan, -fyllan, -stenan, sprecan (some of which however only approach this sense, or can be otherwise explained). ME added to these, a 1300, OVERCARK, -CHARGE (F *surcharger*), a 1400 OVERHEAT, -LADE, -PRAISE, -RUN, *over-dread*, *-sup*, a 1500 OVERDRIVE In the 16th century they begin to abound, as OVERBLOW, -BOIL, -BURDEN, BUSY, -CLOY, -CRAM, -DARE, -EAT, -FEAR, GORGE, LABOUR, -LOAD, -LOVE, PLEASE, REACH, -ROAST, WOO, *over-bake, -black, -cull, -dull, itch* By 1600 it had become allowable to prefix *over-* to any vb whose sense admitted of it, so that we find, besides those entered as Main words

Overtake (*ō vəɪtā·k*), *v* [Early ME. f. OVER 14 + TAKE *v*, q. v. for Forms.

Overtake is the earliest exemplified of a small group of synonymous vbs , including *overcome*, *overhent*, *overget*, *over catch*, in all of which the second element means *take* or *catch* ; the original application being apparently to the running down and catching of a fugitive or beast of chase of the synonymous "catch up" The sense of *over* is not so clear *A priori* we might explain it as 'to *take* by over running, or by getting *over* the intervening space and compare *o erreach* = reach *over* or across a space But it is doubtful whether this was the original notion Beside these *take* verbs, a fig sense of *overtake* (viz. 4 below) was expressed before 1000 by *overgang* and *overgo* , but in these *over* can be explained in the sense 'down upon (OVER 7), so that their orig sense would be descend or fall upon The sense of 'overtake was expressed later also by *overhie overrun*, *overhale*, *overhaul*, but these prob. imitated *overget* or *overtake* In Early ME. *overtrip* and *overstride* had the parallel forms OFTAKE ORGO which seem to have been the strictly southern equivalents (*of*)*take* being actually exemplified earlier than *o ertake* ; the relation between *o* and *over* here, as well as in OTHINK, OVERTHINK, has not been clearly determined]

b. In the General Assembly of the Church of Scotland, and in the supreme court of other Presbyterian churches A formal motion proposing or calling for legislation.

In current use, an overture is a proposal to make a new general law for the Church or to repeal an old one; to declare the law; to enjoin the observance of former enactments; or generally to take any measure falling within the legislative or executive functions of the Assembly Such a proposal must first be made in an inferior court (presbytery or synod), and, if there adopted, is transmitted by that court as its overture to the supreme court. If adopted by the supreme court as an overture, it is submitted to the various presbyteries for approval by them or a majority of them before it can be passed as an act

The OTeut *aig*, *aih-*, answers to a pre-Teutic *aik*, ablaut-grade of *ik*, the original stem of the present of Ner *ī* to possess, own This vb now survives only in Eng. and the Scandinavian langs (Sw *aga*, *ega*, Da. *eie* to own, have) In Eng it has undergone much change both of form and sense. The original preterite inflexion of the present tense (*āh*, *āht āhte*, *āh*, *āgon*) began to fall out early MI to be supplanted by the ordinary pres tense forms (e g 3rd sing, *āhš*, *awep*, *owep*, *awes*, *owes*, pl *āgaþ*, *agep*, *owep*, *owetn*, etc), and in mod Eng the tense is entirely thus levelled, *owe owest*, *owes*, *-eth*, *owe*. The OE. pa t *āhte*, ME *āhte*, *āhte*, survives as *ought* , but before 1200 this began to be used (in the subjunctive) with an indefinite and hence present signification, a use in many senses, and thus gradually came to be in use a distinct verb from *owe* (for which see Ought *v*); its function as pa t of *owe* being supplied in 15th c by *owed* The orig pa. pple. in all the f eut. langs became an adj, of which the mod Eng form is Own *a* , but as a pa pple Ob. *āgen* was still used in 16 17th c. as *owen*, *owne* A later pa pple. *aucht*, *aught*, conformed to the orig. pa t, is found from the 14th c see Ought *v* 7 The current pa pple is *owed*, so that the whole verb has now the ordinary weak conjugation *owe*, *owed*, *owed* The change of signification from *habere* to *debere* can be best traced in the scheme of senses below, but the primitive sense 'have, possess' is not yet extinct in the dialects, which use *ow* or *owe* = *own*, and have not entirely lost the connexion of *owe* and *ought*

Ought, being now in Standard English practically a distinct word, has been fully treated in its alphabetical place, and is not dealt with here, but, for the historical development, the two articles Owe, Ought, should be read together]

II To have to pay

1. To have and the next were expressed in Old Teutonic langs by the verb *āgan* in the sense now represented (both *ahd*, *ahsächs* and *ags* used the pa. pple *āgen* in this sense). The first traces of the mod use appear in the Lindisfarne Gloss. which renders I *debere* where the Rushw. like the later Ags Gosp uses *scealan* ; by the phrase *æg to gebidenne* or *to have to pay*. Examples are wanting during the following two centuries to show the stages by which this was shortened to the simple *to aw* which is found by 1175 in full use both in the sense 'to owe money' and 'to have it as a duty to be under a big tion (to do something)' in both takna, the place of OE *sculan* (now also Ought *v* 2). The result was that *shall* gradually ceased to have the sense owe, retained that of obligation with a weaker force, and became mainly an auxiliary of the future tense, while *to owe*, *owen*, *owe*, *owne* in taking *debere* in its main sense has in Standard Eng. lost that of *habere* or handed it over to the cognate Own which shares it with Ante and such Romanic synonyms as *possess*

2. To be under obligation to pay or repay (money or the like), to be indebted in, or to the amount of, to be under obligation to render (obedience honour, allegiance etc Const with simple dat or *to* The chief current senses

To prevent the exportation of wool it was made illegal by Act 14 Chas II, c 18 § 8 to transport it in the night time and it is probable that it was in reference to the fact that the smugglers of wool carried on their work, like owls, under cover of night, that the terms *owler* and *owling* arose cf quot. a 1700. 2 *Organic Chem* In plural, a name given to several series of acids derived from those of the fatty or the aromatic series, by the substitution of one or more hydroxyl for one or more hydrogen atoms, hence called more exactly *hydroxy-acids*

The diatomic monobasic acids derived from the fatty acids ($C_nH_{2n}O_2$ type, have the formula $C_nH_{2n}O_3$ and constitute the *fatty oxy (hydroxy) fatty acids* or *di-series*. The diatomic monobasic acids derived from the aromatic group or benzene derivatives ($C_nH_{2n-6}O_2$) have the formula $C_nH_{2n-8}O_3$, and constitute the *aromatic oxy acids* or *(hydroxy-aromatic* series.

1877 WATTS *Fownes Chem* (ed 12) II 317 These acids are called *lactic acids* after the most important member of the series, and *oxy fatty acids* because they may be derived from the acids $C_nH_{2n}O$ by substitution of OH for H thus

CH_2CO_2H Acetic acid; CH_2OH-CO_2H Oxyacetic acid *Ibid* 534 These aromatic oxy acids, like the corresponding acids of the fatty series (the lactic acids) exhibit alcoholic as well as acid characters. 1882 Remsen *Introd Organ Chem* 155 The first class which presents itself is that of the alcohol acids or acid alcohols, that is, substances which combine within themselves the properties of both alcoh ls and acids. They are commonly called oxy acids or hydr xy acids.

Ozone (*ōzōun*) *Chem* [a. F *ozone* (1840), f Gr ὄζ-ειν to smell + -ONE] An allotropic or altered condition of oxygen, existing in a state of condensation (having three atoms to the molecule, O_3), with a peculiarly pungent and refreshing odour

It is produced in the electrolysis of water and by the silent discharge of electricity or the passage of electric sparks through the air (whence it is sometimes perceived after a thunderstorm) it is more active than ordinary oxygen is a powerful oxidizing agent liberates iodine from potassium iodide, when heated, breaks up into ordinary oxygen, expanding by half its volume

1840 SCHÖNBEIN in *Rep Brit Assoc* (1841) 214 I shall consider the odoriferous principle as an elementary body and call it Ozone on account of its strong smell *Ibid* 217 I do not, therefore, hesitate to ascribe the familiar electrical odour to ozone 1857 M COLLINS *Mrg & Morch* II vii 138 Ozone, by the fresh ozone of the mountains. 1880 CLEMINSHAW *Wurts Atom The* 119 Ozone is, as we all know condensed oxygen.

The sixteenth letter of the alphabet in English and other modern languages, was the fifteenth in the ancient Roman alphabet, corresponding in position and value to the Greek *Pi*, Π, Π, earlier Γ, Γ, originally written from right to left ⅂, and identical with the Phenician and general Semitic *Pe*, forms of which were ⅂, ⅂. During its whole known history the letter has represented the same consonantal sound, viz. the labial *tenuis*, or lip unvoiced stop, to which the corresponding sonant or voiced stop is B, and the nasal, M. In English, the simple *p* has always this sound; but it is sometimes silent, as initially in the combinations *pn* , *ps-*, *pt-* (representing Greek *πν-*, *ψ-*, *πτ-*), and medially between *m* and another consonant, as in *Hampstead, Hampton, Sampson, Thompson, Dampster, Tompkins*, where it is not etymological, but has the function of indicating for the preceding *m* the short and semi-sonant value which *m* naturally has before pronounced *p* cf. *Simpson, crimson* (simsən, krimzn), with *wimple, winible* In words from Latin, such as *exempt, tempt, peremptory, assumptuous, consumptive, redemption*, and some others, as *Humpty-Dumpty*, where the *p* is (so far as English is concerned) etymological or consciously derivational, there is generally in careful utterance an intention to pronounce it, resulting in an incomplete *p*, which we indicate thus tem$t, ride m$pən, but, in rapid or careless utterance, the *p* disappears, just as in *Ham(p)ton, Thom(p)son*

The digraph PH, *ph*, is used, in continuation of Latin usage, to transliterate the Greek letter Φ, φ, the phonetic value of which is now identical with that of F The words beginning with PH have thus the same relation to the P words proper that those in CH have to the C words; that is, they constitute an alien group, which, only for alphabetical convenience, occupy a place in the midst of the P words proper, between Pe- and Pl-.

Original P in Germanic or Teutonic represents an Indo-European B. But, *mutually*, B was of rare occurrence in Indo-European, and it is not certain that any of the words in which it so occurred were retained in Teutonic, where initial P was consequently very rare Of the Ob. words in P, a few were apparently Common West Germanic, a very few, Common Teutonic; of many of the remainder the origin is quite obscure, but the majority were manifestly adoptions within the historical period from other languages, chiefly from Latin Notwithstanding these extraneous additions, P remained the smallest initial letter (the exotic K, Q, not being counted) in the Old English or Anglo Saxon vocabulary, occupying less than half the space of I, and little more than two thirds of that of Y. Its relation to the other mutes, C (= K) and T, and to its own sonant B, is seen by the pages which these occupy in Toller's edition of Bosworth's Anglo-Saxon Dictionary, which are C 50, T 64, B 78, P 84 pages P might be expected to comprise a corresponding small part of the modern English vocabulary; on the contrary, it is actually the third largest initial, being surpassed only by S and C, with which it forms a triad of gigantic letters, which include nearly a third of all the words in the dictionary. This result is mainly owing to the vast accessions from Greek, Latin, and the modern Romanic languages (chiefly, of course, from French), and especially to the enormous number of words formed with the Latin prefixes *per-*, *post-*, *pre-*, *pro-*, and the Greek *para-*, *peri-*, *pro-*, along with the PH group already referred to But, besides these, P has received great additions, not only in later times from Oriental, African, American, and other remote languages, but, during the Middle English and Modern periods alike, of a multitude of common, familiar, or lower-class words from sources which cannot be traced, often apparently from fresh word-formation. P thus presents probably a greater number of unsolved etymological problems than any other letter

† Pack, *v* [2] *Obs* [Origin obscure. cf PACK *sb* [2]

The sense both in vb. and sb suggests some connexion with PACT *sb* (also COMPACT *sb* [1] c); the implication here being however always bad As to the form though final *-ct* is commonly reduced in Sc. and in some mod.Eng. dial to *c* or *k* (e g *ack fack corrack direck* etc) we have no evidence of such change in Standard Eng of 16 17th c; yet a confusion between *pact* and *packt, packed* is conceivable On the other hand no connexion is apparent between sense 1 and any sense treated under PACK *v* [1]; hence this has been provisionally ranked as a separate word But the later senses esp 4 and 5, appear to arise from a blending of this with PACK *v* [1] with which they are now in feeling associated So with PACK *sb* [2]]
